

Palaeogeographic contextualization of Emsian (Early Devonian) Trilobites

B1

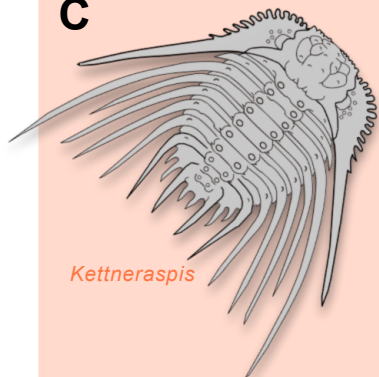

Geographic range
(grid cell occupancy)

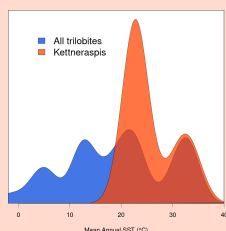

B2

C

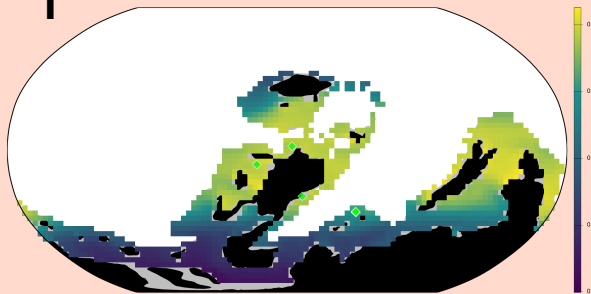

H Sampled thermal niche
(SST distribution density)

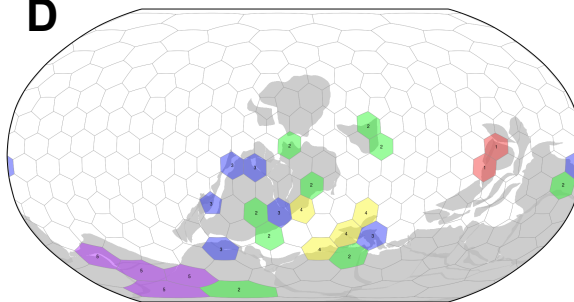

Species Distribution Model
(Environmental suitability based on MaxEnt)

I

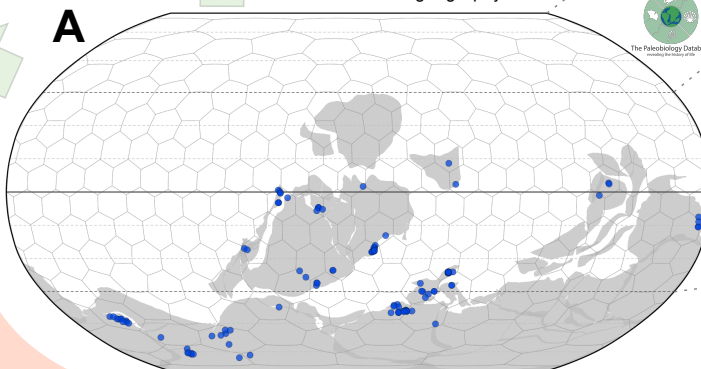

Bioregionalisation (*Jaccard distance, Ward's method*)

D

Reconstructed biogeography

A

402.405 Ma

GPM

400Ma

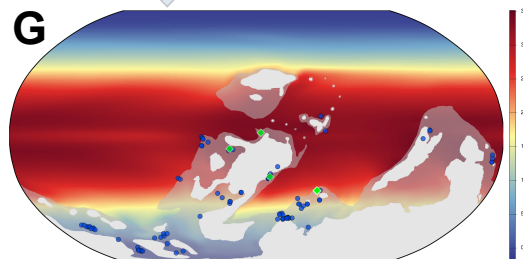

F

Digital Elevation Model

Derived data
products

G

Mean Annual SST (HadCM3), Paleocoastlines

E Latitudinal patterns
(genus richness in grid cells)

Occurrence records in latitudinal bins
